Abstract

The field of Artificial Intelligence (AI) in recent years, has proven critical in almost every sector of the economy. Numerous applications have been developed based on the concepts and techniques provided by this field. Every field of great potential continues to draw attention and evolve. As a result, well-defined terminology also plays a key role in the development and evolution of these important fields as AI is no exception. The PRISMA Flow Diagram is used in scanning the retrieved articles from the Scopus database. A total number of 347 articles were obtained as search results based on the research query of which 21 articles provided 34 definitions. A generic definition for Artificial Intelligence is proposed.?
