

Step 2: Outcomes

Could the intervention(s) listed in Step 1 affect any or all of the following outcomes?

Outcome		Maternal	Offspring
Mortality & Survival		Yes	Yes
Physiological & Clinical		Yes	Yes
Adverse Events/Effects		Yes	Yes
Functioning	Physical	Yes	Yes
	Social	No	Yes
	Role	Yes	Yes
	Emotional/Well-being	Yes	Yes
	Cognitive	Yes	Yes
	Global Quality of Life	Yes	Yes
	Perceived Health Status	Yes	Yes
	Personal Circumstances	Yes	Yes
Delivery of Care	Satisfaction/Patient Preference	Yes	Yes
	Accessability & Availability	Yes	Yes
	Adherence/Compliance	Yes	Yes
	Withdrawal from Treatment	Yes	Yes
	Appropriateness of Treatment	Yes	Yes
	Process, Implementation and Service Outcomes	Yes	Yes
Resource Use	Economic	Yes	Yes
	Hospital	Yes	Yes
	Need for Further Intervention	Yes	Yes
	Societal/Carer Burden	Yes	Yes

Step 3: Specific Outcomes

For both maternal and offspring, list up to four most important clinical/physiological outcomes and adverse events that could be affected by any of the interventions listed in Step 1

Outcome	Maternal	Offspring
Physiological & Clinical	Example Outcome #1	[Outcome]
	Example Outcome #2	[Outcome]
	[Outcome]	[Outcome]
	[Outcome]	[Outcome]

Outcome	Maternal	Offspring
Adverse Events/Effects	Example Outcome #4	[Outcome]
	[Outcome]	[Outcome]
	[Outcome]	[Outcome]
	[Outcome]	[Outcome]
