

Figure 6. Distribution of African Swine Fever outbreak sites in Asia 2018-2019. Sites have been shaded green to red by epidemic day (1 [1 August 2018] to 507 [20 December 2019]). Primary (22/02/2019-22/09/2019) and secondary (14/08/2018-15/10/2018) clusters have been overlaid, with observed/expected values being 12.87 and 6.21, respectively. Data was extracted from the World Organisation for Animal Health (https://www.oie.int/wahis_2/public/wahid.php/Wahidhome/Home).
