

Table 1 Cost estimates for cost-effectiveness analysis of NAC and AC

Event	NAC	AC	Source
Surgery *	2351.96	2367.82	MPFS [29]
Additional surgical procedures *	1854.46	2513.65	
Hospitalization			
with ≥ 3 grade Chemotherapy adverse event treatment	96462	96462	L. Xin et al [26]
Without complication	66800	66800	
Chemotherapy (4 cycles)	30946.5	30946.5	Local charge
≥ 3 grade Chemotherapy adverse event treatment * *	3679.8	3679.8	CTCAE [27] CSCO[28]

* Cost was calculated as the weighted average of results reported in Brandt et al [10]; see Table S 1 for individual procedures and probabilities

* * Cost was calculated as the weighted average of results reported in NATCH [3]; see Table S 2 for individual procedures and probabilities
