

**TABLES**

**Table 1** Baseline characteristics (N=34)

| Patient parameters      | Value        |
|-------------------------|--------------|
| Age, years              | 72.76 ± 8.71 |
| Male sex, n (%)         | 73.53        |
| Indication of pacing, n |              |
| SSS                     | 3            |
| High-grade AVB          | 31           |

Data are shown as mean ± SD.

SSS = sick sinus syndrome; AVB = atrioventricular conduction block.

**Table 2** Intrinsic QRS duration and paced QRS duration (N=34)

| Variable                    | Value       |
|-----------------------------|-------------|
| Intrinsic QRS duration (ms) | 144.87±5.22 |
| Paced QRS duration (ms)     | 116.18±6.15 |

Data are shown as mean ± SD.
