

**Figure 3: Post SBT Assessment in pre and post-intervention phase**

\*Percentages expressed as n/N i.e,number of times each step of pre SBT screen done (n) as a fraction of total number of times each step of pre SBT screen was supposed to be done ideally (N)

\*\*15 patients expired before undergoing a single SBT in phase 1 and 9 patients expired before undergoing SBT in phase 3
